

## How to Use the Data Tables

The data tables offer a wide array of data that was used to determine the representative soil lead level of each parcel. Data on the tables includes, but is not limited to:

- The soil and paint samples collected.
- The locations on the parcel where each sample was collected, including the geospatial location coordinates.
- Depth at which each soil sample was collected.
- Sample results.
- Method for determining sample results.

These data tables may take a while to load because of the large amount of data. The file size of the data tables is large (48 MB).

To begin using the data tables, start with the **Data Legend** tab, which contains detailed explanations of each column:

[Data Legend](#) | 
 [List of Acronyms](#) | 
 [Data Table](#) | 
 [Multiple APN Properties \(71\)](#) | 
 [+](#)

There are also tabs showing lists of acronyms and, for parcels with more than one Assessor's Parcel Number (APN), which one was used as the primary APN (this is the one that will come up on a search of the Data Table).

The **Data Table** tab shows each parcel's unique information:

Property ID	Facility Type	Numeric Address	Street Name	City
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
RP1234	Residential	12345	S Investigation St	Los Angeles
<	Data Legend	List of Acronyms	Data Table	Multiple APN Properties (71)
>				(+)

You can search parcels by address or APN. Click **CTRL/F** to start a search, enter the APN or address, and then click **Find Next** in the search box. When searching for an address, use abbreviations for Street and Avenue, as well as compass directions, but do not use periods. For example, 12345 S Investigation St will take you to that address, but 12345 S. Investigation St. will not.

Each column of data is sortable. You can click the down arrow on the right side of each column to see options. For example, you can sort by address or by the date of cleanup for properties where cleanup is finished.
